## **Abstract**

This project is based on everything about “THE UNIVERSE”. The website mainly attracts people who are really interested about this universe for getting more and more knowledge about it. People can explore a lot about this universe, the models of universe, cosmology, multiverse hypothesis, historical development, expanding universe etc using this project. It gives us lots and lots of information about the thing that we already know and of course more information about the things that exist in this universe which we even have no idea about. but also, it has some contents that are international based like the information given by NASA and many other famous scientists. It also contains news like how we will be able to survive in space and what will happen to earth in the near future. User can also see different images related to this universe through this project. Using my website one can even learn a lot about solar evolution and about the orbit and rotation of the universe as I have linked lots of information about them.

Moreover, it may just be a static page, but one can also use sign up page and fill the information they are asked to use more of the Webpages to gain more knowledge and stay connected to the webpage by signing up which is not facilitated for normal users.

## Acknowledgement

I would like to express my deepest appreciation to all those who provided me the possibility to complete this report. I would like to express my special thanks of gratitude to my computer teacher

**Mr. Sameer Ghimire**, whose contribution in suggestion and encouragement helped me to coordinate my project well. I have to appreciate his full effort in guiding me to get such a fruitful result and, it's all the internet sources that helped to make this project a complete one.

Furthermore, I would also like to acknowledge with much appreciation the great role of staff of GIHE, who gave the permission to use all the required equipment and the necessary material to complete my project "**The universe**". This project has improved my presentation skills and it's all thanks to my teacher for giving such a wonderful and interesting project that can greatly be appreciated.

Also, I would like to thank my parents and my friends whose comments and advices helped me in making and finalizing this project.
